
TIMELESS KITCHENS

7 Classic Kitchen Updates That Never Go Out of Style

We have researched it for you. Here are the 7 elements that every timeless kitchen needs.

This shaker inset door style is a classic for sure. Rigney HomeCraft crafted this kitchen in 2017.

High-End Countertops - Beautiful stone or wood counters never get old. Choose a neutral color for this long-term decision that will allow you to easily introduce new color trends through easier-to-change accessories over the years.

Glass Door Inserts - Adaptable to a multitude of styles, glass inserts in cabinet doors have been around for a long time for a good reason. They lend a furniture-like quality to your cabinets and automatically make the kitchen have an upscale feel.

Big Practical Sinks - You will never regret investing in a large high quality sink that is beautiful as well as functional. One bowl or two is a matter of preference, but a large size is a must. Make sure your selection adds to the beauty of the design and is something you select early in the process - not as an afterthought.

Deep Drawers- Drawers are absolutely fantastic storage and they are replacing traditional upper cabinets in today's designs. A custom cabinet maker can make them even more useful with dividers that hold specific items and heavy duty slides with a soft close feature.

Above -The copper sink we installed in this kitchen added unique beauty to the overall design.

Hardwood Floors - Although there are many good alternatives on the market today, a quality wood floor never goes out of style. It can be refinished over and over and feels fantastic on your feet. Select the best quality floor your budget will allow. It is a big surface and makes a big statement.

Below - This island we crafted is a soft gray with a hickory top. Enduring neutrals.

Neutrals- Folks have been saying white cabinets are going out for years and they don't. Why? Because they are neutral and neutrals have staying power. Not a fan of white? Then go with another neutral color if your cabinets will be painted. For stain grade wood, you can also select a stain color and wood species that has neutral undertones (avoid orange, gold, red undertones).

Contact Rigney HomeCraft for a free estimate or design session when considering a kitchen or bath remodel, new construction, fine carpentry, custom doors, built-in shelving and entertainment centers or heirloom furniture.

Light -Natural light is always welcomed in the best designs so plan for as much as possible. Equally important is lighting you add including recessed, under counter, toe kick LEDs and overhead. Seek out the advise of a good lighting expert (often free in lighting showrooms) for help to be sure you have enough light for your situation.
